## UI/UX Consultancy

December 7th, 2023

Yasmeen and I met while we worked on the Corporate Registers Forum 2022 together; We worked on more projects during our time together as consultants for the Ministry of Economic Development. After having worked with her, it would be an understatement to say that she is one of the most proficient UI/UX designers I have ever come across! Her ability to understand the Ministries needs' holistically (at least pertaining to the project she worked alongside me) and delivering on each project within the timeframe required in the expected quality impressed me!

She is one of the most reliable team members that I have worked with; one could always rely on her to exceed expectations even when plugged into the most difficult parts of a project!

Yasmeen was also the UI/UX client-side consultant for Matcon Pvt Ltd during my tenure as Director of Finance at the company, and she played a crucial role in ensuring the website had a modern, easy-to-use interface.

It was a pleasure working alongside her and I would recommend her not only in the fields of design, UI/UX and project management, but as someone that is great to work with.
